

Utility Flags – What You Need to Know

If you see colored flags placed around your property, please don't remove them!

Removing them can lead to accidental damage or dangerous situations.

These flags are placed in the City utility easement to mark underground utilities before a contractor begins work in the area. They are essential for protecting your safety, your property, and the crews working nearby.

Here's what each flag color represents:

- Blue – Water
- Green – Sewer
- Red – Power
- Yellow – Gas
- Orange – Fiber/Communications
